Watonwan Counties in Minnesota

Who We Are

Volunteers managing a prescribed burn.

By Steven Gahm.

The Many Rivers Chapter is a grassroots community dedicated to protecting rare prairie and oak savanna habitats in your area. We actively steward these threatened places through hands-on land management and provide education about these rare ecosystems.

If you love learning and making a difference outdoors, join us for a field trip to learn about native wildlife, gain experience with restoration equipment and techniques at a work party, and build connections with your community.

Nature Near You

Prairie Enthusiasts enjoying a class in the prairie.

By Addie Theis Paradis.

Prairies once covered more than a third of Minnesota, yet only a fraction of these native habitats have survived. Tucked among our plentiful river systems and within our nature-loving communities, southern Minnesota's few remaining prairies support rare plants and animals and lend us a chance to re-connect with the wild beauty of the lands we call home.

Whatever your skills or interests, we invite you to join our active community and lend your unique talents toward caring for the land. Typical volunteer activities include removing invasive species, seed collecting, prescribed burning, collaborating with community partners, and hosting educational events. Visit our website or scan the QR code on the back panel to get involved.
